CAN BE PRODUCED IN THE HEIGHT & LENGTH OF YOUR CHOICE

Safely reach every part of your vessel in dry dock with easy-to manoeuvre mobile platforms.

They can be built to any size so are ideal for providing flexible cleaning or maintenance access to vessels of all sizes. Exclusive locking mechanism ensures they stay put while in use. The chunky wheels are suitable for use on uneven or gravel surfaces and thick rubber bumpers prevent accidental damage to hulls. Ideal for use in marinas, they can be loaned or rented as required to those working on their own boats.

GRP is much lighter than the steel equivalents, making the

maintenance platforms easier to manoeuvre while maintaining strength. It's also anti-slip – even when wet or oily, impact-resistant and won't rust, so will last longer with little to no maintenance. All the materials used are self-coloured and UV-stable so won't chip or fade. It's quiet to walk on too, helping to reduce noise on site.

Our Mobile Maintenance Platforms:

- Are designed to BS standards with **5kn/m2 loading**
- Include an exclusive locking mechanism to hold them in position while in use

- Made using GRP Grating and Stair Nosing which remains anti-slip even when wet or oily
- Are non-corrosive, non-conductive and long-lasting
- Lightweight, making them easy to manoeuvre into position
- Provide safe access and a stable work space for cleaners, painters and engineers
- Easy to build and modular in design – can be supplied fully fabricated or in modules
- Bespoke designs can include anti-climb Mesh, Safety Gates, Safety Chains and special colours
